JoinUp logo usage guide

The symbol is a ring with one slot cut out and one dot stepping in: “one more player”. Hebrew-first UI, Latin wordmark.

LOCKUP AND SYMBOL

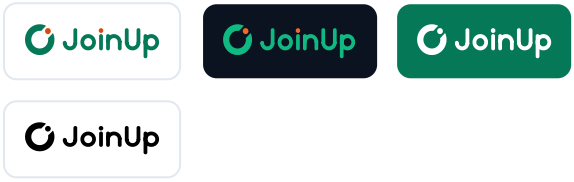

Use the lockup by default. The symbol alone is for avatars, favicons and app icons. Do not recreate or retype the wordmark: its letters are custom outlines.

COLOUR

- **Brand green #047857** · RGB 4 120 87 · on white 5.48:1
- **Accent orange #D9480F** (the dot only) · on white 4.30:1
- **Dark-theme green #10B981** · on #0b1220 7.38:1
- **Dark-theme orange #F2672A** · on #0b1220 6.02:1

#047857 is only 3.41:1 on #0b1220, so on dark surfaces always use the `on-dark` files. CMYK/Pantone are not specified: match by eye from a proof.

APPROVED BACKGROUNDS

White, #0b1220 (on-dark), brand green (white version), and single-colour black for print/fax/stamps. Photos: only where the area behind the logo is quiet and reaches 3:1.

CLEAR SPACE AND MINIMUM SIZE

- Clear space = the symbol’s diameter ÷ 5 on all sides (dashed area).
- Symbol: min **16 px** / 5 mm.
- Lockup: min **96 px** wide / 25 mm. Wordmark only: 64 px.

TYPOGRAPHY AND RTL

- UI and Hebrew text: **Heebo** (Regular 400 / SemiBold 600). The rounded monoline wordmark is a custom drawing that pairs with it.
- The logo is Latin and **is never mirrored** in RTL layouts: symbol left, wordmark right, in both directions.
- In Hebrew copy write “JoinUp” in Latin letters; keep it the same size as surrounding text, don’t restyle it.

APP ICONS

- Android adaptive: white mark, solid `#047857` background, mark inside the 66 dp safe zone.
- Play Store: `play-store-icon-512.png`, full bleed, no rounded corners (Google masks it).
- Web: `favicon.svg` auto-switches to the dark colours; `favicon.ico` as fallback.

DON’T

Rotate or tilt

Stretch or squash

Light-bg green on dark

On busy / low-contrast fills

Shadows, glows, gradients

Also: don’t move or recolour the dot (except to one-colour), don’t fill the slot, don’t add a sport graphic, don’t set the wordmark in another font, don’t place the orange dot on green (use the white version).

FILES

Folder	Contents
`svg/`	symbol, horizontal lockup, wordmark × color · on-dark · black · white · mono-green · mono-green-light. All outlined (no live text, no strokes).
`png/`	Transparent PNGs: symbol 1024 px, lockup 2400 px, in color / on-dark / black / white.
`favicon/`	favicon.svg (auto dark), favicon.ico (16/32/48), PNG 16–512, apple-touch-icon-180, maskable-512.
`android/`	Adaptive icon foreground / monochrome / background (SVG + 432 px PNG) and a legacy 192 px icon.
`play-store/`	play-store-icon-512.png (+ SVG source).

Before launch: run a trademark search (Israeli registry, WIPO, USPTO) and a reverse-image search; this kit is not legal clearance. The wordmark is custom geometry, so no font licence applies to it.
